

Example 4

$$\sum M_{\odot A} = 0$$

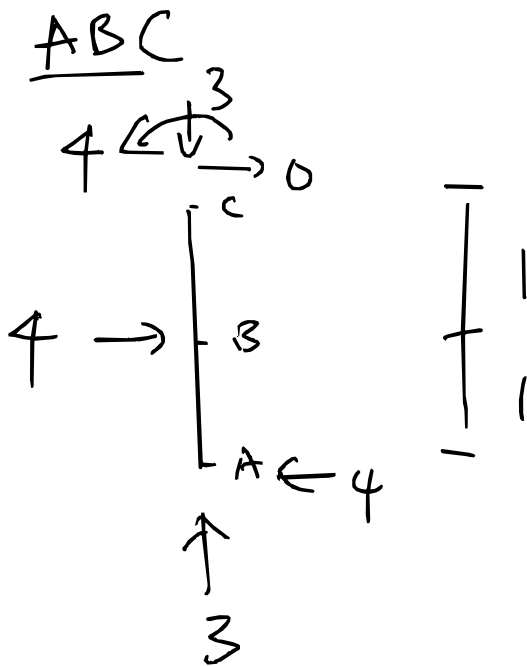

$$-4 - 2 \times 4 \times 2 + R_D \times 4 = 0$$

$$\Rightarrow R_D = \frac{1}{4} (4 + 16) = 5$$

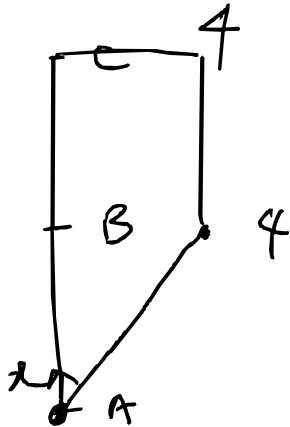

$$\sum F_y = 0$$

$$\Rightarrow R_{Ay} + R_D - 2 \times 4 = 0$$

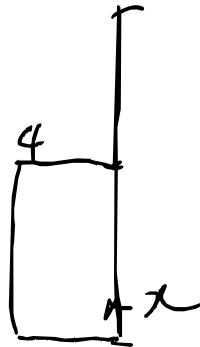

$$\Rightarrow R_{Ay} = 3$$
